Subject: microsoft

The settlement is ridiculous -- damages and compensation should be paid to every person who bought any of the Microsoft products, and the company should be broken up in to separate operating systems branches and each application should be in separate companies.

The browsers should be in a separate company, fax and office application in another etc.

If we look at what dishonest marketing has done in terms of getting market share and the resulting hidden costs of running Microsoft products its just plain ridiculous.

thanx
